

Warwickshire Geological Conservation Group

Warwickshire Local Geological Site	
Site No: 84	Edge Hill Landslip
Geological Formations	Charmouth Formation (Jurassic) Dyrham Formation (Jurassic)
Criteria Form	p 2
Description	p 3
Photographs	p 4
Location Map	p

Local Geological Sites (LoGS), designated by locally developed criteria, are currently the most important places for geology and geomorphology outside statutorily protected land such as Sites of Special Scientific Interest (SSSI). The designation of LoGS is one way of recognising and protecting important Earth science and landscape features for future generations to enjoy.

WGCG is responsible for the identification of LoGS in Warwickshire and the West Midlands.

Please note that designation of a site as a LoGS does not confer a legal right of access. Unless the site is on a designated public right-of-way, the landowner's permission is required before visiting.

Warwickshire Local Geological Site - Criteria Form

Site name: Edge Hill Landslip		Also known as:	
District: Stratford-upon-Avon		County: Warwickshire	
Grid reference: SP 381 487		LoGS Number: 84	ESCC Class: IS
Brief Description: hummocky landslipped feature with composite rotational slips			
This site qualifies as a Local Geological Site for the following criteria:			
A Good Example of a landslipped hillside			
Educational Fieldwork			
1. Educational Potential	✓	2. Physical access	✓
		3. Safety	✓
Scientific Study			
1. Diversity of interest		2. Rarity of interest	
		3. Size of feature	✓
4. Typicalness of feature	✓	5. Geological/physiographic linkage to: <i>Warmington Church Marlstone Exposure (85)</i>	
Historical Value			
1. Celebrity link		2. Pioneering research	
		3. Historical link	
Aesthetic Value In The Landscape			
1. Local importance in the landscape		2. Promotion of Earth science	
Signed  I M Fenwick, Chairman, Warwickshire Geological Conservation Group		Date first selected 28th March 2002 Reviewed by LoGS panel Oct. 2009 Further survey required LoGS Confirmed ✓	
Endorsed by			
Warwickshire Museum		Natural England	
J Radley, Keeper of Geology		J A Irving, Conservation Adviser	
In the event of any development or planning consultation relating to this site or its surrounds please inform: The LoGS Officer WGCG, c/o Keeper of Geology, Warwickshire Museum, Market Place, Warwick CV34 4SA (tel: 01926-418182)			

**WARWICKSHIRE GEOLOGICAL CONSERVATION GROUP
LOCAL GEOLOGICAL SITE (LoGS)**

Site	84	Edge Hill Landslip
Parish		Radway
District		Stratford-upon-Avon
County		Warwickshire
National Grid Reference		SP 381 487
Ordnance Survey Sheets 1:50000		151
1:10000		SP 34 NE

Location
The field at the North end of Knowle End Wood bounded by the wood, the B4086 and the road to Arlescote.

Summary of Interest
A typically hummocky landslipped terrain developed near the junction of Charmouth Mudstone and the Dyrham Formation, probably lubricated by water which issues at the contact.
